

AQUAPANEL®

Laminex® Aquapanel®

Laminex® Aquapanel® is a melamine surfaced high-pressure decorative laminate specifically designed for a wide variety of vertical wall applications.

The innovative strong and durable 2.7mm sheets feature a black core allowing the distinctive black edge to be exposed in applications.

Laminex® Aquapanel™ has a moisture resistant backing and a balanced construction ensures board flatness. It has excellent impact strength, which is more than adequate for normal applications, enabling supporting framework to be spaced at 600mm centers. It is available in a range of colours and patterns.

Laminex® Aquapanel™ are ideal for:

- Shopfitting and commercial applications
- Wall Panelling and Partitioning
- Bathroom and laundry applications in new homes and renovations

Although Laminex® Aquapanel™ is ideal for use in wet areas, this material must not be immersed in water for lengthy periods nor should it be continuously exposed to saturated moisture conditions.

Product Characteristics

Decors & Patterns

Refer to current Laminex® Aquapanel™ brochure for decors and patterns available.

Aluminium Jointers

Five aluminium jointer profiles have been developed by The Laminex Group to stylishly integrate joints and minimise areas where mould and grime could gather. Each profile is available in 9 colours so you'll find the perfect match for your choice of Aquapanel.

COMPLIANCE

Laminex® Aquapanel™ conforms to AZ/NZS 2924.1 for high-pressure decorative laminates and has been approved by governing bodies. It conforms with New Zealand Building Code and specific regulatory (where applicable) for moisture resistant classification.

WHEN SPECIFYING

Material shall be Laminex® Aquapanel™ as supplied by The Laminex Group. Colour and/or pattern shall be..... in..... Finish.

CARE AND CLEANING

Laminex® Aquapanel™ is easy to clean. Clean the sheet surface with warm water and mild liquid detergent only. Do not use abrasive cleaners, waxes or polish on the surface.

SITE WORK NOTES

Storage & Transport

Sheets should be transported flat with minimum flex. Bulk stocks of Laminex® Aquapanel™ should be stored flat on pallets and covered with a polythene type sheeting to avoid dust penetration. Before installation store sheets upright on the longest edge and face to face on the decorated surface. Keep the work area clean. Lift sheets carefully. Do not slide on decorative surface or use as a work surface.
